

AIR Graffiti Wall

Plato said

"You can learn more in one hour of play than in one year of conversation".

AIR Graffiti Wall is a unique and exciting product that allows the creation of virtual graffiti on a digital wall.

The interactive experience is operated with a rear projection screen, laptop, projector and infrared spray can.

As you press the infrared spray can, an infrared light beam is emitted which is tracked by the computer. The AIR Graffiti software converts the light beam into a virtual image that appears on the projection screen known as the "Digital Graffiti Wall", creating a vibrant and colorful drawing.

The output is a digital image file that can be printed and/or shared via email and social media networks such as: Facebook
